CHERRY CREEK'S **PROGRESS THRU PERFORMANCE** **BULL SALE**

Welcome to our 46th annual "Progress thru Performance" Bull Sale!

We feel this offering possesses the deepest quality we have ever made available. These bulls are progeny, performance, PAP, fertility and now I50K DNA tested. These high density genetic markers will add more accuracy and when used in conjunction with the generations of performance records we have submitted over the decades, will give you a more clear picture of the progeny each bull will produce. I, without hesitation, encourage you to use this tool to assist in making all your seedstock selections. Sometimes these DNA markers do not follow the individual performance of the bulls and changes their expected progeny differences (EPDs) dramatically. Virgin bulls that are not DNA tested are much lower in accuracies for the traits measured and thus are less predictable.

A big change for this year's sale is the fact that will be showing the video of the bulls instead of bringing them through the ring. Logistically it will be much better from a safety standpoint when it comes to loading out during the sale, as the alley is shared by bulls and people. We also feel it will provide a more realistic view of how the bulls move out and travel. We encourage you to evaluate them thoroughly before the sale on the video. Video's will be available two weeks prior on DVAuction.com. As always you are invited to see them live at anytime before the sale at the ranch.

We hope the bulls meet your expectations and are true performers on your ranch. As always, we value your business and thank you for the support for all these years.

Warmest regards,
The Booths

Shawn and Diane

Lindsy, Brylie, Baylie and Bryce

With the reality that sometimes young bulls become injured during their first breeding season, we have worked to come up with a fair and reasonable way to share this risk with our bull customers.

GUARANTEE

All bulls selling for \$2,500 or more will be covered 50% by Cherry Creek Ranch if they are injured during their first breeding season. Breeding season is defined as the 90-day period following the first turn out of the bull. 50% of the value of the injured bull, minus FULL salvage value will be given as a credit. If a replacement bull is available of equal or higher quality the bull will be replaced, otherwise the credit can only be applied to the next year's bull sale. All injured bulls must be diagnosed by a veterinarian. Please notify us as soon as possible if an injury occurs, and prior to the injured bull being sold for salvage. All claims must be made by Sept. 1, 2019.

Example 1: A \$5,000 bull is injured and will not heal. A credit of \$2,500 minus full salvage value will be given to the buyer.

Example 2: A \$2,500 bull is injured and will not heal. A credit of \$1,250 minus full salvage value will be given to the buyer.

Example 3: A \$2,400 bull is injured and will not heal. No credit is given. Buyer retains all salvage value.

Should you desire to add coverage to the guarantee by Cherry Creek Ranch, Jim Geis with American Livestock Insurance will be at the sale, please visit with him following the sale to make insurance arrangements. They offer full mortality coverage should you desire to purchase it.

ABOUT THE CATALOG

Scrotal measurements and actual sale day weights are provided on page 56 of the catalog. If you have any question concerning any of the bulls or anything pertaining to the sale in general, please call.

Thank you for your consideration.
